1) Flow rate complies with EN 274:2002

2) Average dimension (adjustable by rotating outlet tube)

WIPER PREMIUM drains incorporate an insulating flange which is useful in creating a perfect seal between the drain and tiles. As an option, it is possible to purchase a sealing membrane which lays on the flange and under the tiles extending the waterproof area around the drain. When the insulating flange is not required, please refer to our WIPER CLASSIC series without flange.
